

**FOR IMMEDIATE RELEASE**

20/01/2021 - National Prostaff is pleased to announce the addition of Jeff Dougherty to the Amphibia Eyegear team for 2021.

Jeff Dougherty

sponsored by

Amphibia Eyegear

Amphibia Eyegear announced today the addition of Jeff to their 2021 roster of brand ambassadors. Jeff Dougherty was discovered through the NPS fishing and hunting sponsorship platform and Amphibia Eyegear is pleased to have reached a deal that will have Jeff promoting their products and representing their brand.

### **About National Prostaff**

NPS is an online community and platform dedicated to connecting anglers and hunters with top sponsorship opportunities. Established in 2011, NPS has connected more than 16,000 anglers and hunters with sponsorship deals at more than 500 brands.

### **About Amphibia Eyegear**

From the very beginning, Amphibia has set our sights on revolutionizing the performance eyewear industry through innovation and leading-edge technology. Designed for outdoor enthusiasts by outdoor enthusiasts, Amphibia floating eyegear is so much more than just another pair of sunglasses. From the rugged, lightweight polymers that form the basis of our high-flotation architecture, to the ultra-clear lenses that meet or exceed the highest standards for impact resistance, we're performance-focused. ? In fact, we're extremely proud to offer the world's first-and-only ANSI-rated floating eyegear. Maintaining buoyancy while being rugged enough to attain the highly coveted ANSI Z87.1 impact safety rating is quite literally a moon landing in the eyewear industry. ? Even with everything we've accomplished so far, we're never content to rest on our laurels. At Amphibia, innovation is our mantra. We're constantly seeking out new technology, fresh processes, and the latest materials in an unrelenting quest to design and build the very best high-performance floating eyegear your money can buy. Innovation has gotten us this far, and that same innovation will carry us into the future. Amphibia floating eyegear – Because Earth is mostly water.
